Note for IBM file:

STATINTL

[ ] NSA, advises that they have provided a highly classified listing of NSA documents being withheld. This listing is for the eyes of the judge alone. Its purpose is not to comply ~~to~~ WITH the court's order, but to expose the judge to the nature of the problem. The listing consists of one sheet of paper to a file, summarizing the contents of the file with dates. The Deputy Director/NSA is going to New York during the third week of February with sample documents, but NSA is still pressing the judge to come down to NSA for a briefing.

10/10/73 CHARLES R. ESHERICK, [REDACTED]

DOT ANTI-TRUST DIV. 187X 2492

Wants to come over next week to see if we can't produce some records in response to court order.

DOT has set up rough schedule on trial 1. BY JAN 1974 - interview, and party deposition, pre-trial conference etc. 2. Try case in Sept.

TELEX decision has changed things some.

IBM wants info. on procurement and evaluation of computers. Feel we must have stuff they can see. Feel court will not be sympathetic to our privilege plea. He obviously can't fathom "sources + methods".

Told him most offices offering  
something (declassification - sterilized  
copies - listings for examination  
by FBI at CIA)

He thinks sterilized Xerox  
copies will be acceptable.

14 February 1973 DCI, DDI and DDP advised that all responsive documents produced for original search. They have no such documents in Records Center. DDS&T [ ] has directed their offices to complete search and segregation of inactive files at Records Center by 23 March. DDS has only OL files at Records Center. [ ] advises that OL has about 250 unclassified files possibly pertinent. Search involves about four man-weeks of work, and can be completed about mid-March. I advised DOJ (Fitzgerald) that we would have stored files available for inspection about the end of March.
